WORK EXPERIENCE

California College of the Arts

Hyderabad, Telangana

Senior Product Designer

May 2025 - Present

- Reduced faculty onboarding support requests by 35% by redesigning LLM-assisted workflows into structured conversational systems after observing repeated intent ambiguity and high cognitive load during academic planning interactions.
- Unified fragmented academic planning tools across 3 departments and 6+ academic cycles by consolidating disconnected systems into a centralized operational layer, aligning scheduling, curriculum planning, and administrative workflows into a single interface.
- Introduced a rule-driven academic planning architecture that encoded institutional policies and constraints into structured scheduling logic, reducing planning cycles from 6 iterations to 3 while improving cross-department consistency.
- Resolved conflicting stakeholder priorities between faculty flexibility and institutional governance by redesigning approval and exception-handling flows with structured escalation paths, balancing autonomy and policy enforcement.

Dayout

Indianapolis, Indiana, USA

UX Designer

Feb 2024 - Apr 2025

- Reduced trip-planning effort from 7 steps to 3 by designing a unified travel planning system informed by 70+ user interviews that revealed users think in intent-based clusters rather than sequential planning steps, often repeating discovery across fragmented tools.
- Increased booking conversion and reduced drop-off by redesigning MVP browsing and checkout flows through iterative prototyping and usability testing focused on decision friction and intent clarity.
- Designed the platform's first scalable interaction system across multiple verticals (dining, concerts, outdoor activities), establishing reusable decision patterns that reduced product iteration cycles from 4 weeks to 2.
- Improved early product alignment across engineering and product teams by translating ambiguous 0→1 requirements into structured interaction flows and validated prototypes under technical constraints.

Wipro Technologies

Hyderabad, Telangana

Product Designer

Jun 2019 - Jul 2022

- Reduced operational reconciliation time from 6 hours to under 1 hour by redesigning refinery and terminal control dashboards for dispatch, throughput, and hazardous material tracking across 5 operational regions.
- Improved audit readiness and regulatory traceability by redesigning compliance-heavy enterprise systems with structured data models, validation logic, and real-time operational visibility.
- Re-architected high-volume operational interfaces into role-based decision systems that improved task execution reliability among refinery operators working in high-risk, time-sensitive environments.
- Reduced reporting errors by 25% and improved system adoption across 300+ users by standardizing enterprise interaction patterns and leading iterative QA-driven design validation cycles.

Assistant Product Manager

Feb 2020 - Nov 2021

- Led cross-functional coordination for enterprise data platform initiatives, managing vendor evaluations, deployment planning, and risk assessments across 55+ applications while ensuring performance, security, and operational continuity within BP's SDN infrastructure.

Software Developer

Jun 2019 - Jan 2021

- Designed and maintained scalable ASP.NET MVC backend services and RESTful APIs using separation of concerns, dependency injection, and unit/integration testing practices to support maintainable enterprise application architecture.

SKILLS

Research: User interviews, usability testing, journey mapping, service blueprinting, contextual inquiry, stakeholder interviews, competitive analysis, heuristic evaluation, cognitive walkthroughs, and affinity mapping.

Design: Inclusive design, Behavioral Design, User flows, Process Flow, Wireframe, Ideation, Prototyping, Sitemap, Archetypes, Interaction Design, Ethical Design, Accessibility, Web App, Mobile products, Responsive Design, Brainstorming, Documentation, UX Design, Service Blueprint, Design Thinking Workshops

Tools and Languages : Figma, Miro, Jira, Asana, UserTesting, Qualtrics, ServiceNow, Adobe Creative Cloud, ChatGPT, Claude, Perplexity, Cursor
HTML, CSS, JavaScript, Python, SQL, C#, .NET, ASP.NET MVC, Azure, AWS, version control

EDUCATION

Indiana University Purdue University Indianapolis

Indianapolis, Indiana, USA

Master's in Human-Computer Interaction, Minor in Applied Psychology

Graduation Date: May 2024

Jawaharlal Nehru Technological University

Hyderabad, India

Bachelor's in Electronics and Communication Engineering

Graduation Date: May 2019
